

Interactive Dashboards with Tableau using google sheets.

Aim:

To create an interactive Tableau dashboards that integrates data from google sheets & visualises it using bar cluster, line plots and scatter plots, allowing diverse exploration of sales or demographic data.

Materials Required:

- * Tableau Desktop or Tableau public
- * Google account with Google sheets.
- * sample sales or demographic dataset or google sheets.
- * Internet connection.

Procedure:

- * prepare the data.
- * connect Tableau to google sheets.
- * ~~create~~ Individual visualization.
 - ⇒ Bar charts c sales by product or Region.
 - line plot c sales - times
 - Scatter plot c customers

* Build the dashboards

* Publish on screen

Result:

Created an Interactive Tableau dashboard
~~linked~~ to google sheets, allowing users to
explore sales trends, compare producer performances
& analyze change applies.
